FLOOR MATTING
SITESAFE Anti-Slip/Spillage Matting

Manufactured from 100% recycled factory waste. Hard wearing and versatile whilst providing excellent slip resistance. Its two layer tubular construction allows for fast drainage of any water or oils that may be in the workplace.

Colour: black

Type	Dimensions	Order Code SSF-946
Roll	0.5m x 10m	-7160K
	0.75m x 10m	-7170K
	1m x 10m	-7180K
Matt	0.5m x 0.9m	-7190K
	1m x 1.1m	-7200K

Barefoot Wet Room Matting

Warm, comfortable, self draining safety matting for barefoot applications. The soft embossed surface combined with anti-bacterial and anti-fungal additives and excellent drainage, offers a safe solution for shower rooms, poolside and changing areas.
Oxford Blue

Colour	Dimensions	Order Code SSF-946
Ocean Blue	0.5m x 10m	-7500K
	1m x 10m	-7510K
	1.2m x 10m	-7520K
Oxford Blue	0.5m x 10m	-7530K
	1m x 10m	-7540K
	1.2m x 10m	-7550K
Charcoal Grey	0.5m x 10m	-7560K
	1m x 10m	-7570K
	1.2m x 10m	-7580K

Anti-Slip Matting

Light, comfortable and economical matting.
Insulates against cold floors, reduces standing fatigue and provides excellent slip resistance. **(DIN 51130 R11)** Floorline is suitable for areas where occasional spillage may occur.

Colour	Type	Dimensions	Order Code SSF-946
Red	Roll	0.6m x 10m	-7010K
	Roll	0.9m x 10m	-7020K
Blue	Roll	0.6m x 10m	-7050K
	Roll	0.9m x 10m	-7060K

SITE MAINTENANCE

SITESAFE Anti-Fatigue Matting

Standing on a hard floor for prolonged periods without anti-fatigue matting can cause pain and discomfort in the lower legs, feet and back. Fatigue reduces concentration and therefore productivity. Anti-fatigue matting will increase comfort and productivity for workers who stand for long periods and substantially reduces stress, tiredness, aches and pains from standing on hard floors at work. Introducing anti fatigue matting into the workplace can provide staff with a more comfortable environment, which in turn encourages increased efficiency, concentration and productivity.

Diamond Zone
Manufactured from extremely hardwearing rubber capable of operating in high temperature environments. Diamond surface provides greater traction with extended wear and can be easily cleaned. Interlocking tile system enables the user to produce any required length. Also offers insulation against cold floors.

Colour: black.
Thickness: 12.5mm.

Size (mm)	Order Code SSF-946
700 x 800	-2640D

Work Mat
Hard-wearing SBR rubber construction. Raised circular surface for superior slip resistance - suitable for wet conditions. Features a moulded bevelled edge to reduce tripping.
Conforms to Slip Resistance Test **EN13552 Category R10.**

Colour: black.
Thickness: 10mm.

Size (mm)	Order Code SSF-946
800 x 1200	-8459E
900 x 1500	-8460F

Knee Saver Mat
Manufactured from a closed cell PVC/nitrile blend. Reduces knee pain and lower back stress caused by regular kneeling, ideal for pain relief during floor fitting.

Resistant to oils and chemicals.
Colour: black.

Size (mm)	Order Code SSF-946
530 x 360 x 25	-4650R

Ortho Lite
Offers the user relief from fatigue caused by standing. Insulates against cold concrete floors. Ideal for use in dry environments. Pebble surface provides additional traction.

Colour: charcoal.
Thickness: 6mm.

Size (mm)	Order Code SSF-946
900 x 1500	-5060F
900 x 1820	-5070H

Ribbed Mat
Durable mat, manufactured from hardwearing natural rubber. Effective slip-resistance. Provides insulation from cold concrete floors. Use on workbenches to prevent component damage.

Colour: black.
Thickness: 3mm.

Size (mm)	Order Code SSF-946
900 x 2500	-6760P

Entrance Mat
Scrapes dirt and wipes moisture. Slip resistant PVC backing.

MATLOCK **Door Controls**

This comprehensive range of Door Controls feature varying power sized units for many different door applications.
They come with a choice of architectural covers which are each available in 26 different plated or colour coated finishes.
To help select the correct closer for you, each unit has a listing showing their key features, certification numbers and fire ratings.
Plated arms are available on certain units only, and test certificates are available upon request.

BS EN1154 Classification
This standard classifies door closers using a six digit coding system. Each digit relates to a particular feature of the product measured against the standards performance requirements.

Digit (1) - Category of use:
'**3**' denotes the unit is for closing doors from at least 105°.
'**4**' denotes the unit is for closing doors from 180° open.

Digit (2) - Durability:
'**8**' successfully completed 500,000 test cycles.

Digit (3) - Test door mass/size:
Seven grades are identified as shown in the table below (where a closer provides a range of power sizes both the minimum and maximum sizes shall be shown):

Power size	Test door mass	Recommended door leaf width
1	20kg	750mm
2	40kg	850mm
3	60kg	950mm
4	80kg	1100mm
5	100kg	1250mm
6	120kg	1400mm
7	160kg	1600mm

Digit (4) - Fire behaviour:
'**0**' denotes the unit is **NOT** suitable for use on fire/smoke doors.
'**1**' denotes the unit **IS** suitable for use on fire/smoke doors.

Digit (5) - Safety in use:
'**1**' all door closer units are required to satisfy the essential requirement of safety in use.

Digit (6) - Corrosion-resistance:
'**0**' - indicates no defined corrosion-resistance,
'**1**' - indicates mild corrosion-resistance,
'**2**' - indicates a moderate level of corrosion-resistance,
'**3**' - indicates high corrosion-resistance,
'**4**' - indicates very high corrosion-resistance.

Within this section units have been tested to **BS EN1154**, with many units also having been tested to current Certified testing and **CE** test criteria. Therefore, the six digit classification is shown against each of the varying units, thus indicating their performance and grading under **BS EN1154**.

Budget Contract Door Closer

Size 3 Mechanism 28730
Silver finish. **CE** tested. Closing force size 3 (**EN1154**). Maximum door width 950mm. Suitable for doors 40 - 60kg. Adjustable latch action. Fire tested to **BS EN1634-1**. One hour fire rated. Self handing (fits to left or right hinged doors). 180° opening (retains control of door when opened 180°).

MATLOCK Panic Hardware

This panic hardware range of emergency exit devices contains products that are certified to the European **CEN** standards **BS EN179 & BS EN1125** and offers a design to give optimum safety and security. All products meet with the required standards in today's market. They have an anti-thrust mechanism to protect against attack, carry a ten year manufacturer's guarantee and are two hour fire rated. Standard sized units are suitable for doors up to 2440mm high and 1220mm wide. Special sized vertical shoots, horizontal bars, keeps and pullman catch kits are available on request.

BS EN1125 Classification

This is the European standard for Panic Exit Devices. This determines that a Panic device must be fitted where members of the public are present and have no prior knowledge of the exit or hardware.

BS EN179 Classification

This is the European standard for Emergency Exit Devices. This determines that in emergency situations occupants will have prior knowledge of the exit and panic situation is unlikely to occur. Each standard is tested and evaluated and a 9 digit code is produced. **BS EN 1125** & **BS EN 179** are harmonised under the Construction Products Directive and products must therefore carry the **CE** mark.

MATLOCK Security Ratings

All padlocks have a rating to indicate how secure they are, this is based on material, hardening, extra coating, shackle diameter, body width, and other security features such as anti-pick locks and 3, 4, 5 or 6 pin cylinders.

SECURITY RATING

1 2 3 4 5 6 7 8 9 10
MIN............MED...............MAX

Rating	Uses
1 - 2	Minimum security for indoor and outdoor use on tackle boxes, suitcases and drawers etc.
3 - 4	Minimum to medium security for indoor and outdoor use on garages, cabinets, toolboxes, gates, truck doors, lockers, sheds, bicycles etc.
5 - 6	Medium security for indoor and outdoor use on garages, cabinets, toolboxes, gates, truck doors, lockers, sheds, bicycles etc.
7 - 8	Medium to maximum security for indoor and outdoor use on store front and factory gates, large toolchests, construction site storage etc.
9 - 10	Maximum security for indoor and outdoor use on store front and factory gates, large tool chests and construction site storage etc.

Brass

Solid brass body with a hardened steel shackle and a double locking mechanism. For indoor and outdoor use on minimum to medium security items. 20mm: 3 pin cylinder. 30 and 40mm: 4 pin cylinder, 50 and 60mm: 5 pin cylinder.
*Single locking only.

Pipeline Marking Legislation

Health & Safety (Safety Signs & Signals) Regulations 1996

The purpose of the Directive is to encourage standardisation of safety signs throughout all of the member states of the European Union. This regulation requires employers to label pipe work that contains hazardous substances. The colour of the label is defined by British Standard BS 1710 or European Standard RAL. Pipe work marking tape should be positioned on both sides close to all valves, changes in pipe direction, where pipes pass through other walls or floors and every 7 - 14m on straight runs of pipe work.

AVON BS Pipeline Marking & Identification Tape

Suitable for use at filling points, drain valves, stops and flanging points. It is recommended that pipes be clearly labelled at points where contents of the pipes could be exposed. Polypropylene coated vinyl tape for durability. 50mm x 33m.

Hazard Tape Legislation

Regulation 13 of the Workplace Regulations 1992 (Part V of Schedule I) requires:
• All dangerous locations, obstacles and traffic routes must be marked in yellow/black diagonal stripes.

Regulation 17 of the Workplace Regulations 1992 (Part V of Schedule I) requires:
• All traffic routes within workplaces are indicated where necessary for health and safety reasons, using markings consisting of a continuous highly visible line.

AVON Barrier Tape, Lane & Hazard Tape

High quality self-adhesive diagonal stripe hazard tape. High grade PVC.

Hazard Warning Tape
Conventional usage:

For low head room, obstructions to be avoided, changes in floor levels, mobile equipment and placing around warning notices.

For locating fire equipment, placing around prohibition and indicating inflammable areas.

For placing around fire escapes, safety equipment, first aid posters and equipment and breathing apparatus.

MATLOCK — Welded Straight Link Chain

Often used for common everyday uses such as trailer ties and door stays as well as the handling of materials in industry. The chain has the weld placed at the side of each link of chain. A popular and versatile product. Welded chain is light and strong, ideal for general-purpose applications such as park swings, garden use, security etc. Manufactured from mild steel. Supplied in 10m length packs in boxes.

Link Sizing
Japanned
From the ancient Japanese method of stove enamelling. Results in an attractive shiny black surface. Ideal for outdoor use.

Link Size a x b x c (mm)	Recommended Loading (kg)*	Length per Box	Weight each (kg)	Order Code MTL-978
3 x 21 x 8	50	10m	1.60	-1010K
4 x 26 x 9	85	10m	2.70	-1020K
5 x 28 x 11	130	10m	4.70	-1030K
6 x 33 x 13	140	10m	7.00	-1040K
8 x 40 x 15	160	10m	9.00	-1050K

Galvanised
Gives a high standard of corrosion resistance in all exterior environments. The thickness of the zinc coating may be variable due to the process of dipping in molten zinc. Recommended for exterior use.

Link Size a x b x c (mm)	Recommended Loading (kg)*	Length per Box	Weight each (kg)	Order Code MTL-978
3 x 21 x 8	50	10m	1.70	-1110K
4 x 26 x 9	85	10m	2.90	-1120K
5 x 28 x 11	130	10m	5.00	-1130K
6 x 33 x 13	140	10m	7.20	-1140K
8 x 40 x 15	160	10m	9.30	-1150K

Bright Zinc-Plated (BZP)
Zinc-plating involves the electrolytic application of zinc by immersing clean steel parts in a zinc salt solution and applying an electric current. This process applies a layer of pure zinc. Ideal for exterior use.

Link Size a x b x c (mm)	Recommended Loading (kg)*	Length per Box	Weight each (kg)	Order Code MTL-978
3 x 21 x 8	50	10m	1.70	-1210K
4 x 26 x 9	85	10m	2.90	-1220K

Z-Barrier™

Effective solution that guarantees satisfactory BARRIER CONTROL in any environment

Traditional systems for controlling people traffic using standard barriers connected via a chain or belt going pole to pole are associated with the continuous problems of maintaining a safe place to work. Even expanding barriers or self-retractable barriers could break, fall down or blow away exposing people to unnecessary and unacceptable risk. The cumbersome nature of the sturdier systems also limits their usability, making them less flexible and impairs their portability. These problems are magnified in areas that have to cope with work space restrictions and hazardous working conditions such as those found in the offshore gas and oil industry. Barriers are a key requirement of the Health and Safety (Safety Signs and Signals) Regulations.

The 'Z-Barrier' system is the most innovative improvement in temporary safety barriers and provides an effective solution that guarantees satisfactory barrier control in any work environment.

'Z-Barriers' are patent pending for the unique design that ensures barriers are prominent and remain in position, for all physical and environmental conditions.

Manufactured from a unique, reinforced PVC-based double-sided warning tape, with a high visibility day glow pattern on one face and a night reflective pattern on the other face.

These are the most visible barriers available on the market today. Quick and easy to put up, they are easily fastened to any anchor point or each other, providing a flexible barrier across any opening, around objects or in multiple directions. Elastic properties allow 'Z- Barriers' to expand and fit between points instead of being cut to length. They are inherently shock absorbing and resist any degree of wind load to prevent damage.
