P-633 MOLYBDENUM GREASE

Effective Date: 15-7-2014

Description:

P-633 Molybdenum Grease is a multipurpose grease formulated with a premium base lubricant in addition to molybdenum dislfide and graphite. It also contains rust, oxidation, corrosion inhibitors and extreme pressure additives for extending equipment life and provides outstanding lubrication and mechanical stability in a wide variety of temperatures and applications. Excellent performance in lubricate industrial roller bearings and machinery operating under heavy loads and high temperatures.

Application:

P-633 Molybdenum Grease is recommended for heavy duty multipurpose application such as ball bearing, wheel bearing, oven conveyor, king pin, pillow block, sliding surfaces, fifth wheel, crane, and auto chassis lubrication.

Features:

- Good water resistance
- Good oxidation stability
- Excellent mechanical and storage stability
- High temperature protection up to 260 °C

Typical Specification:

NLGI Grade 2 - 3 **Dropping Point** None Appearance Smooth Thickener / soap type None Structure Smooth Colour dark Gray Base Oil Viscosity cSt at 40°C : 100 - 150 Water Resistant Yes / Good

Note

All recommendations for use of our products, whether given by us in writing, orally, or to be implied from the results of tests carried out by us, are based on the current state of our knowledge at the time such recommendations are made. As additional information is learned, these recommendations may be updated. They may also be impacted by circumstances outside our control. Notwithstanding any such recommendations, the user shall remain responsible for satisfying himself that the product as supplied by us are suitable or his intended process or purpose. Since we cannot control the application, use or processing of the products, we cannot responsibility therefore. The user shall ensure that the intended use of the products will not infringe any third party's intellectual property rights.
