3-color large LCD screen

- White for measurement mode
- Green for calibration mode
- Red for calibration error

The replaceable pH probe is built with lithium glass membrane and blue gel electrolyte, ensuring high accuracy and fast response.

*Tips to quickly get a stable reading.

Before calibration, **shake the probe vertically** for a few seconds in the calibration bottle.

When measuring, make a **quick stir** in the solution before taking the reading..

Simplest design allows you to complete 2-point calibration within 30 seconds to keep the highest accuracy.

Double-junction structure significantly increases durability of the probe
