

Skew Roll Conveyor Pipe Blasting Machine

Cat No. WBM2-00

- Model P2415 24" 15Hp
- P3620 36" 20Hp
- P4825 48" 25Hp
- P9040 90" 40Hp

The pipe machine utilizing one or two centrifugal wheel(s) and adopt the skew-rolling technique in the conveyor construction.

This type of machine is able to do blasting of pipe size from 1" to 90" and is capable of producing up to 600 square meters per day. Since the machine is operating in an enclosed and controlled environment complete with dust collector and abrasive recovery system, dust and noise levels have been reduced to minimal.

This machine can be designed for its portability. In a boxed up design, mobilization from place to place is made simple. It does not require special foundation for installation or rigging up at site. Automatic push button loading and unloading can also be incorporated with the installation of raw material feeding racks & complete works material receiving rack.
