3/8" Drive Dual 80° Technology Extra-Long Handle
Locking Flex Head Ratchet

**EVEN OUR
LEAST
COMPLICATED
TOOLS ARE
THE PRODUCT
OF ADVANCED
THINKING.**

You might not expect continuous innovation in something as tried and true as hand tools. Until you see the Snap-on® three-position needle nose pliers. Or our locking flex-head ratchet. They're both ingeniously designed tools that can help you get into the otherwise impossibly tight spaces you encounter more and more often in today's world. And they're just two examples of the innovative thinking we do every day. You can almost hear the gears grinding in our heads. And if you ever need to get at them, we probably have a tool for that.

RATCHETS

Dual Technology Ratchets (1/4")

Stop, turn and listen. A smoother, stronger ratchet.
Try them to believe them.

Dual  Technology Ratchets feature:

- -tooth gear, provides  degrees of swing arc
- Six teeth in contact with gear to provide strength and durability
- Sealed head keeps dirt and other contaminants out of the head mechanism

TES10B

Shallow, Inches, Chrome (1/4")

Snap-on® spline wrenching tools have been developed to service high-tensile strength spline nuts and bolts widely used on both military and commercial aircraft. Precise, radial spline teeth engage the fastener teeth over a wider area to minimize stress, and allow application of high torque to reduce risk of damage to the fastener or to the tool. Chrome tools comply with Military Spec. MS-□□□□ and MIL-W-□□□□. The unique spline wrenching configuration can also be used on ordinary □ and □ point fasteners with an advantage similar to the Snap-on® Flank Drive® wrenching system.
