Video Intercom System

See and Talk from Wherever* You Are

See, Listen and Record Your Way to Greater Security for Your Family.

* The main monitor and wireless monitor can be used as far as 100 m apart provided there are no obstructions in-between them, however some buildings and environments shorten the range of radio waves. Keep communication equipment at least 20 cm in all directions from the main monitor and wireless monitor because noise from the intercom system may interfere with communications.

Panasonic

Check the Front Door from Any Place in the Home

Panasonic's Wireless Video Intercom System brings upgraded features and ease of operation that will enhance security for your family. It can be easily installed and conveniently expanded. The system includes a monitor for seeing and hearing activity at the front door, a convenient wireless monitor that can be carried about, an IPS LCD that can be easily viewed at angles and from below, a beautiful 5.2 inch color monitor, recording support that can safely store a maximum of 400 images, and whole lot more. And, it comes with Transfer Calling that allows use as an ordinary phone plus a host of features for enhancing family communications.

Also available is a 3.5 inch LCD Model that is great for enhancing family security and can be easily installed anywhere in the home as demanded by your family's situation. Panasonic is concerned about the safety of your family.

Security* Made Easy with a Wireless Video Intercom

Checking Visitors without Opening the Door

To keep your family safe, you can check visitors on the monitor without opening the door. This means you can feel safe and secure even when you're home all alone.

Selecting the System—That's Right for You

The Panasonic wireless video intercom solution: Tough, Convenient, Expandable

Needs

Security

I need effective protection for my home and family.

Comfort

It has to be easy enough for everyday use.

Future Enhancements

You may want to add on new functions later.

Solutions

Toughness

The system is tough enough to withstand attempts to break it.

Convenient Functions

You can control everything from indoors.

Expandability

You can add on wireless monitors and repeaters to expand the system.

* This model is not produced to prevent house-breaking. Panasonic assumes no responsibility for injuries or property damage resulting from it.
