

Algatec® The Chlorine-Synergy Algaecide

Quickly Kills & Prevents. Results in 4 to 24 Hours (Black in 7 to 10 Days)

The Synergy

Green-Yellow-Black Algaecide

- Kills and controls all algae ... green, yellow and black types.
- Superior effectiveness and fast results in just 4 to 24 hours - most algae.
- Eradicates difficult black algae (fungi) growths in 7 to 10 days.
- Very effective with or without chlorine.
- Strong synergy with chlorine - will not consume chlorine.
- Clarifies pool water while removing algae.
- Strongest, fastest acting algaecide available.

Contains no copper, silver, bromine, quats, and ammonia that may stain or consume chlorine.

ALGATEC® PRODUCT DATA SHEET

PRODUCT FUNCTION:

Algatec® is a strong, highly effective dual-action algaecide that quickly kills all types of green algae. The product also eradicates yellow algae and black types (i.e algae, bacteria, & fungi biomass). Algatec® has a powerful interaction with chlorine based sanitizers which helps to enhance algae cleanup and removal. However, this product does not require or use chlorine to kill algae. Algatec® quickly combats algae growths and prevents new growth due to its biostatic inhibitor function. And Algatec® leaves pool water sparkling clear due to its powerful clarifying action.

HOW IT WORKS:

Algatec's® unique cationic polymeric compound functions as a broad spectrum, non-oxidizing algaecide-microbicide that kills and controls the growth of microorganisms by disturbing their normal metabolic process of the living cell. Algatec® has a powerful synergy with chlorine sanitizers which further enhances algae kill and removal. The product is metal-free, non-hazardous to handle, will not foam, and does not remove chlorine from pool water.

FEATURES:

1. Kills and removes all types of green, blue-green algae growths.
2. Erradicates yellow algae blooms and black algae-fungi.
3. Super-clarifies pool water during cleanup function.
4. Prevents algae regrowth due to biostatic inhibitors

SELLING POINTS:

1. Extremely effective algaecide for all pool environments.
2. Superior and fast results. Strong synergy with chlorine enhances removal.
3. Ultra-clarifies pool water during cleanup.
4. Salt pool friendly - will not interfere or deposit on cell plates.
5. Metal-free, non-hazardous to handle, will not foam or stain.

CONSUMER BENEFITS:

1. Easy to use for algae removal and cleanup.
2. No testing required and does not require chlorine for algae removal.
3. Will not interfere with pool water pH, chemistries, or sanitizer levels.
4. No wait. Swim immediately after treatment.
5. Minimal brushing required for yellow or black algae removal.
6. Will not stain pool surfaces, swimmer's hair, and clothing.

SPECIAL INSTRUCTIONS:

For severe cleanup pools, use extra chlorine to help remove dead algae.
