

X Fog Fogging Solution

X Fog Fogging Solution is a water-based thermal fogging carrier product special design for EC and EW formulation pesticide. X Fog Fogging Solution reduce the toxicity created by diesel and stop the oily film on objects under oil based thermal fogging treated area. X Fog Fogging Solution s a combination of few glycol alcohols. It is a limp liquid of higher viscosity as water and neutral (PH=7). Flashpoint about 130 C. X Fog Fogging Solution is quickly absorbed by the air after application because of its unlimited water solubility.

Benefits of BestChem Fogging Solution

- *Non-flammable
- *No significant odor
- *No phytotoxic to plants
- *Enables droplets to flow longer distances
- *Designed for sensitive applications such as vector control in residential areas and grain warehouse.
- *Reduced irritation and toxicity release from diesel when carriers in thermal fogging applications

Aplication

Make sure fogging machine is operating correctly and determine the amount of pesticides recommended for per hectare.

Mix X Fog Fogging Solution 3 parts to 1-part water generate thick smoke.

Mix X Fog Fogging Solution 2 parts to 2 parts water generate moderate smoke.

Mix X Fog Fogging Solution 1 part to 3 parts water generate light smoke.

After fogging, clean nozzles, conduits, fog tap and the solution tank with water or oil as this is the normal maintenance procedure.
