## TERMITES

These industrious insects work 24 hours a day, gradually eating wood and any other cellulose containing material in their environment. Since they remain hidden within the wood in which they are feeding, in mud tubes, or in the soil they typically wreak havoc undetected.

## HOW DOES **DEFENDOR 350** PROTECTS YOUR HOME ?

- Non-repellant : Termites are unaware of the presence of **DEFENDOR 350**, will not avoid the treated area and get infected silently.
- Termites contaminate each other with **DEFENDOR 350** through their social interaction and finally will affect the entire termites in the colony.

## DIRECTIONS OF USE :

SITE	PEST	USAGE RATE / 10 LITRE WATER	METHOD OF TREATMENT
Building foundation site	<u>Pre-construction</u> Termites ( <i>Coptotermes</i> spp.)	7 ml	Horizontal Barrier : spray 4 litre/m <sup>2</sup> solution. Use 5.5 litre/m <sup>2</sup> under coarse-textured or sandy soil condition. Vertical Barrier: spray 15 litre solution into 30cm soil depth for every linear distance of 3 metre.
	<u>Post-construction</u> Termites ( <i>Coptotermes</i> spp.)	7 ml	Drill holes spacing of 40-60 cm. Inject 5 litre solution in each hole.
