

PRODUCT INFORMATION SHEET

**NEW
SERRICO.**

1 PRODUCT IDENTIFICATION

Product name	NEW SERRICO 200 (Tobacco beetle) NEW SERRICO 100 (Tobacco beetle)
Target insects	Tobacco beetle
General use	NEW SERRICO (Tobacco beetle) is an indoor monitoring device for Tobacco beetle (<i>Lasioderma serricorne</i>). This product is designed for ecology of target insects, and it enables early detection of a male and female by using synthetic pheromone and food attractant. Monitoring insects is the way to identify target insects and grasp the status of infestation.
Product description	Monitoring device for Tobacco beetle (wall hanging type)
Application	Tobacco and food processing factory, container, warehouses of tobacco leaf, cigarette, food materials and processed foods, etc.

2 COMPOSITION

This product is composed of a device by paper and two lures containing sex pheromone and food attractants. The glue side of device is marked with monitoring grid line for easy monitoring.

Lure is a disc covered with a release control film. The disc contains Serricornin and food attractant.

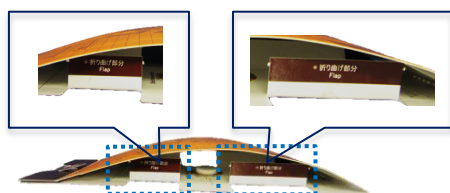

3 HOW TO USE

Assembly

- Fold device along the crease and peel off the protective paper of the glue side.
- Take out two lures from the silver and gold package and set it on the “Stick the lure here (to the circle mark)” on the glue side.

*Fold up the flaps on the side when device is used in the dusty environment.
(See the figure below.)

- Close the device by inserting the bottom lips into the slots on the top edge of one.

Placement and use

- Location: Place the devices on the wall 1.5m above the floor and 5 to 10 m apart recommended.
- Hang the device on the wall, pillar or suitable location in an open space where the devices will not be disturbed or tipped.
- Affix the device securely.
- Periodically count the target insects for inspection.
- Replace with new devices after a month of use, or when it is full of insects.
 - * Avoid placing the devices near machinery or production lines, as it may attract insects to these places.
 - * Placing the devices near building entrances may attract insects outside. Place those devices 10 to 20 m away from entrance and exits.

4 HANDLING AND STORAGE

Handling

- Do not break the protecting film covering the lures.
- Do not remove the lures from the packing material until ready to use.
- Store the product in original package. Do not open package ready to use.
- Do not eat or drink when handling the product.
- Do not touch the cover film of lures directly by hand.
- Wash hands after handling.
- Keep out of children's reach.

Storage

- Store unopened carton in original packing at room temperature in a dark place.
