Dear Sato Shuhei:

We are pleased to inform you the Epson SC-S80600L printer is now officially approved and licensed by Pantone. Epson may publicize the Epson SC-S80600L printer is capable of achieving 96.5% of the PANTONE® Solid Coated Colors when used in conjunction with Avery MPI1105 substrate using Epson ink.

Our findings indicate that 1,802 (96.5%) of the PANTONE® PLUS Solid Coated Colors are within the gamut of the Epson SC-S80600L, ink, with Avery MPI1105 substrate.

We also find that 65 (3.5%) of the PANTONE® PLUS Solid Coated Colors are outside the gamut of the Epson SC-S80600L, ink, Avery MPI1105 substrate system. Therefore, only simulations to these PANTONE® PLUS Solid Coated Colors are achievable.

If you need any further assistance, please feel free to contact me at the number below.

Sincerely,

*Barbara Senatore*
