

IoT Watt EV

All in one EV Charger Management

IoT Watt EV provides simple and comprehensive management of your EV Chargers. It is designed to collect and store data from your EV chargers for monitoring, reporting and billing purposes. IoT Watt EV was created to meet the needs of condominium administrators, private car park operators, private charging service providers and other stakeholders with similar needs.

Most importantly, it puts both your EV Charger Revenue and Expenses within your own control. You don't have to depend on anyone else to collect the revenue when you are responsible for the expenses. It allows you to formulate the most suitable EV Charge billing suitable for your installations, because only you know your overall costs.

Any and all brands and models which are compliant to OCPP can be integrated into IoT Watt EV, just about all available in the market. IoT Watt EV enables you to create and manage your own charging network and easily (un)subscribe users, customise reports and use this information to address only the action items that add value to your operations. With an easy and intuitive dashboard, IoT Watt EV offers customisable reports by user, charger, consumption and tariff, including invoices simulation. All this makes monitoring, controlling remotely the chargers and/or reporting processes simpler and automatic.

CLOUD-BASED
PLATFORM

MONITORING
& REPORTING

BILLING

USER & USAGE
MANAGEMENT

IoT WattEV is the platform designed by Saturn Pyro to **collect and store data** from a specific set of **EV chargers** located in car parks, offices & communal blocks.

Product highlights:

DASHBOARD

Easily obtain a general overview and the most significant data about an installation or a group of installations at a simple glance.

MAP

Locate and check your chargers' status on a map in a very easy and quick way.

PARKING GUIDANCE

Availability of free parking spaces and occupancy analysis also scheduling and booking of charging lot

TARIFFS

Hourly rates and/or fixed costs detailed on billing simulations.

REGISTER/ UNSUBSCRIBE USERS

Manage the authorised users of your charging network as well as their permissions and profiles as required.

EV CHARGER LOG DISPLAY

Reduce the fault resolution time and obtain a detailed diagnosis if any charger is not working properly.

CUSTOMISABLE REPORTS

Design, generate and send reports automatically by e-mail, as well as invoice simulations with consumption data, times, rates.

COMPATIBLE WITH OTHER BRANDS

Connect other EV chargers, aside from Circontrol's, as long as they comply with the OCPP 1.6 protocol

Designed for:

Johor Bahru Office
