Hydrogen: The World's Smallest Molecule

Hydrogen's incredible ability to help prevent and treat diseases comes from its potent antioxidant ability to neutralize hydroxyl free radicals.

What Are Hydroxyl Free Radicals?

Hydroxyl free radicals are linked to disease, inflammation, and symptoms of aging. When molecules split into single atoms with unpaired electrons, hydroxyl free radicals are created. These unstable atoms then cause damage by bonding to healthy cells and scavenging electrons, creating oxidative stress in our bodies.

How Does Hydrogen Molecular Works?

Hydrogen molecules neutralize hydroxyl free radicals

Neutralize hydroxyl free radicals form into water and discharge from our bodies, burden free

Benefit of inhaling Hydrogen Gas

Our machines generate pure Hydrogen Gas with a molecular purity of > 99.999%. Inhaling 1 minute pure Hydrogen Gas is approximately equivalent to drinking 3 litres of Hydrogen Rich Water.
