

Family of Endoscopic Products

EVOMED, offers a growing range of laparoscopic access devices that aim to meet the majority of diverse laparoscopic surgical needs. In the development of these products primary focus is on absolute safety to the patient achieved through ergonomic design and ease of use.

evomed evoscope

evopneu Insufflation Needles

The EVOPNEU Needles are used for traditional CO₂ insufflation techniques for the simple, safe and effective creation of a pneumoperitoneum prior to abdominal endoscopy.

We offer a choice of a 2.1 mm diameter needle in 120 mm or 150 mm lengths.

HIGH PERFORMANCE
SHARP BEVELLED
NEEDLE

150cm
LENGTHS
