

HUGONG Portable **CNC** Cutting Machine

INTELLIGENT CUTTING

SMART

- **WHOLE NEW DESIGN**
For customer actual needs
- **MOTOR UNIFIED MODEL**
Rotation upgrade, more powerful
- **TURNING COVER TYPE**
Convenient maintenance and service
- **UPGRADED CONTROL SYSTEM**
Various language choice, 7 inch LCD
- **CUTTING GRIPPERS MODULAR**
Convenient for flame & plasma exchange
- **HIGHER PRECISION STRUCTURE**
Aluminum base plate and modular vertical guide rail structure

HUGONG WELDERS

Since **1958** SHANGHAI HUGONG ELECTRIC(GROUP)CO.,LTD.

INTELLIGENT CUTTING

HUGONG WELDERS

Description

- Applicable for cutting any complex plane figures as the large -sized gantry CNC cutting machine and support both flame torch and plasma cutter.
- USB port ensures easy transmission program and data, which converting CAD drawing or drawing composed by computer into G code for cutting of workpiece, saving G code to USB storage and transferring to cutting machine, and system converting G code into cutting program.
- The integration of cutting software makes drawing, nesting and cutting simple and efficient, providing high level of material utilization & optimization.
- Portable CNC cutting machine is widely applied in industries such as automobile, shipyard, locomotive, petrochemical, aviation and aerospace, boiler and pressure vessel, machinery, decoration and large-size metallic signs. Affordable for cutting and blanking of carbon steel and stainless steel, copper and aluminum.

Applied Range

- Light Industry

Specification

MODEL	INTECUT 3015
Input Voltage	220V (Customised voltage is available)
Frequency	50 or 60Hz
Input Power	180W
Monitor	LCD 5.7" with keyboard
Effective Cutting Size(W*L)	1500*3000
Moving speed	Idle speed: 0-5000mm/min
Flame Cutting Speed	Cutting speed: 6-750mm/min
Transverse Arm	2000 mm
Rail Length	3500 mm
Total Weight	110kg
Cutting Mode	Flame/Plasma
Cutting Gas	Acetylene, Propane, Methane, Coal gas

Since **1958**
Total welding and cutting solutions
