

Stainless Steel Manual Multipod Valve (VP-F56A-SS)

VP-F56A-SS Manual Multipod Filter Valve

The F56A-SS manual multipod filter valve features a flow rate of 4m³/h and utilizes a corrosion resistant gasket for opening and closing functions. It can be used as a service, backwash, and fast rinse valve, even under pressure. With a handle, you can switch the settings easily without turning off the pump or the power. When selecting a valve setting, make sure to always depress the handle before turning.

Brand	VEPURE
Model	VP-F56A-SS
Material	Plastic come with SUS 304 Stainless Steel Cover
Max. Working Pressure	8 bar
Max. Working Temperature	2 °C ~ 50°C
Max. Flow Rate	4.0 m ³ /hr
