|                                                    |                                                                                             |

#### Mechanics/electronics

| Connection type | M12, 12-pin male connector  |
|-----------------|-----------------------------|
|                 | M12, 4-pin female connector |

 $^{\mbox{1)}}$  With front window mounted.

2D MACHINE VISION

| Supply voltage         | 24 V DC, ± 20 %               |
|------------------------|-------------------------------|
| Ripple                 | < 5 V <sub>pp</sub>           |
| Current consumption    | < 450 mA, without output load |
| Enclosure rating       | IP67 <sup>1)</sup>            |
| Housing material       | Aluminum                      |
| Window material        | РММА                          |
| Weight                 | 350 g                         |
| Dimensions (L x W x H) | 100 mm x 53 mm x 38 mm        |

<sup>1)</sup> With front window mounted.

#### Performance

| Sensor resolution     | 640 px x 480 px      |
|-----------------------|----------------------|
| Scan/frame rate       | 40 fps <sup>1)</sup> |
| Number of inspections | 32                   |
| Reference images      | 32 objects           |

<sup>1)</sup> Max. 250 fps.

#### Interfaces

| EtherNet/IP™                  | ✓                                                                           |
|-------------------------------|-----------------------------------------------------------------------------|
| Data transmission rate        | 100 Mbit/s                                                                  |
| Operator interfaces           | Inspector Viewer                                                            |
| Configuration software        | SOPAS ET                                                                    |
| Data storage and retrieval    | Log for 30 images, record images on PC, store images to FTP                 |
| Ethernet communication        | EtherNet/IP™                                                                |
| Digital input                 | 4 inputs (24 V)                                                             |
| Configurable inputs           | External trigger, encoder input, External teach, reference object selection |
| Digital output                | 3 digital outputs, 24 V (B-type)                                            |
| Configurable outputs          | Output by logical expressions, Additional image storage possibility via FTP |
| Output current                | ≤ 100 mA                                                                    |
| Standard outputs              | No object detected, Everything OK, Detail error                             |
| Maximum encoder frequency     | 40 kHz                                                                      |
| External illumination control | 5 V TTL                                                                     |
| I/O box extension             | 5 x inputs for object selection, 16 outputs                                 |

#### Ambient data

| Shock load                    | EN 60068-2-27               |
|-------------------------------|-----------------------------|
| Vibration load                | IEC 60068-2-6               |
| Ambient operating temperature | 0 °C +45 °C <sup>1)</sup>   |
| Storage temperature           | -20 °C +70 °C <sup>1)</sup> |

<sup>1)</sup> Relative humidity: 35% ... 85%, 95% in storage.

## SICK AT A GLANCE

SICK is one of the leading manufacturers of intelligent sensors and sensor solutions for industrial applications. A unique range of products and services creates the perfect basis for controlling processes securely and efficiently, protecting individuals from accidents and preventing damage to the environment.

We have extensive experience in a wide range of industries and understand their processes and requirements. With intelligent sensors, we can deliver exactly what our customers need. In application centers in Europe, Asia and North America, system solutions are tested and optimized in accordance with customer specifications. All this makes us a reliable supplier and development partner.

Comprehensive services complete our offering: SICK LifeTime Services provide support throughout the machine life cycle and ensure safety and productivity.

For us, that is "Sensor Intelligence."
