# YOUR TESTOSTERONE IS

## DROPPING!

**LOW** TESTOSTERONE  
= **LOW ENERGY**

1. **Testosterone** is the building block for male which serves as the main component for energy

2. Also a dominant hormone for male, testosterone is vital for **muscle development, bone mass and fat distribution**

3. Poor testosterone level will cause the body to **become drained and lethargic** – eventually lose overall energy

**Low**  
**TESTOSTERONE**  
**IS A NEGATIVE**  
**SIGN**

*Lack of testosterone will lead you to:*

**Increased Body Fat**  
Significant Weight Gain

**Chronic Body Fatigue**  
Frail Body

**Weak Muscle**  
Loss Of Muscle Strength

**Weak Stamina**  
Unable To Keep The Pace

**Decreased Motivation**  
Lazy To Do Anything

**Emotional Imbalance**  
Getting Annoyed More Than Usual

**Anxiety**  
Prolonged Emotional Issue

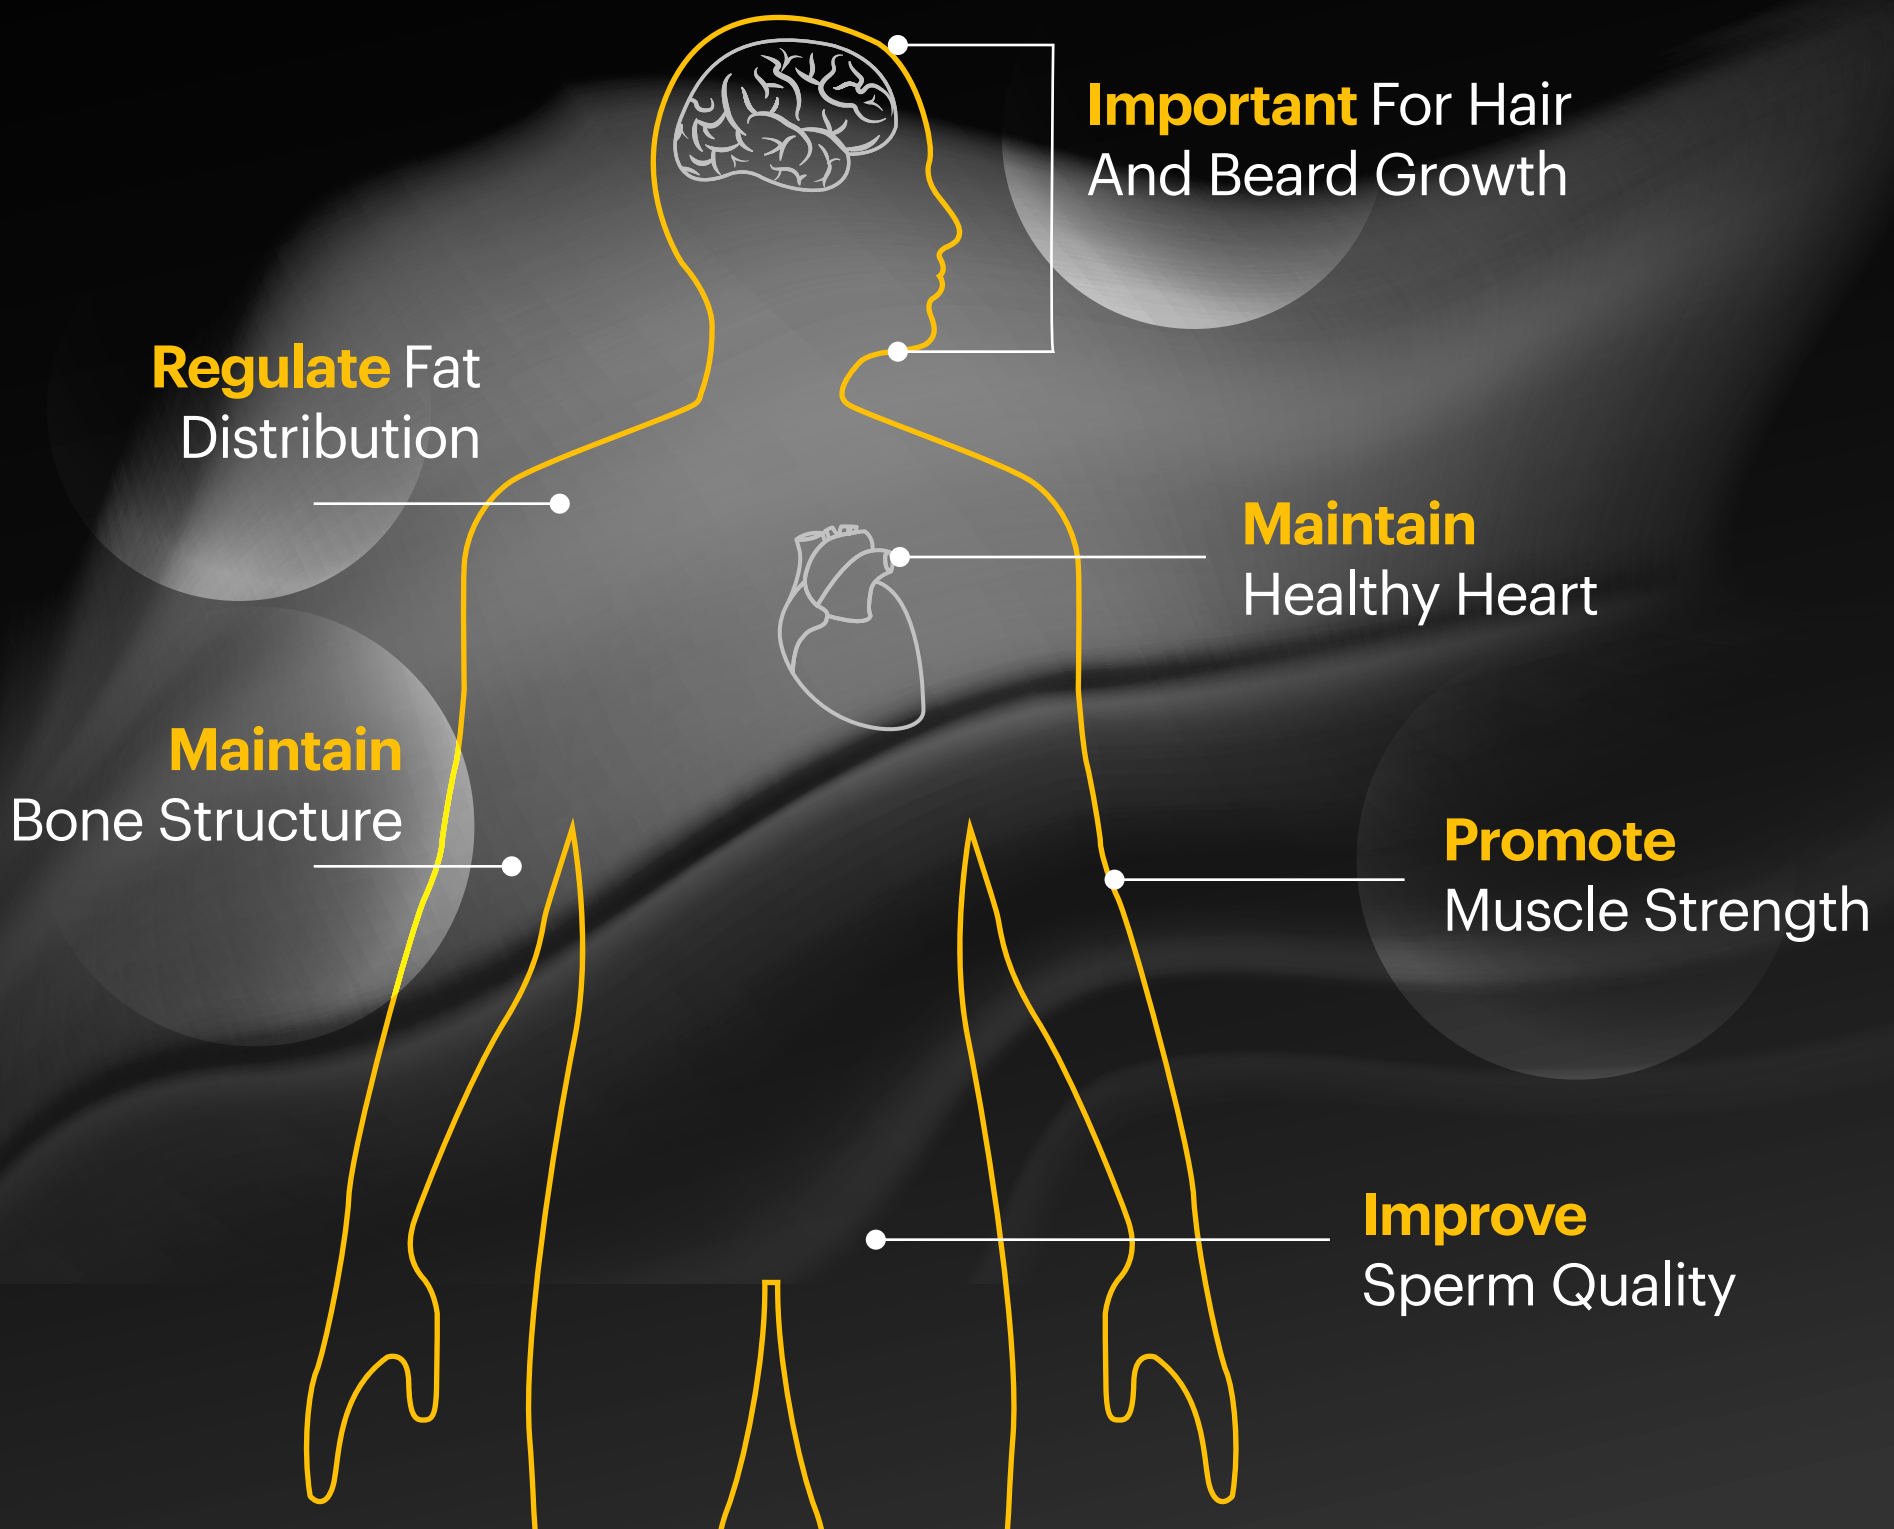

**Sleep Problem**  
Insomnia

ALL OF WHICH CONTRIBUTES TO  
LOW LEVEL OF **ENERGY**
