

Sky Tunnel

Commercial Project

- Site:** Green Cross Incorporated, Parañaque City, Metro Manila, PHILIPPINES
- Task:** Reduce energy consumption without introducing any heat load on the building.
- Application:** Warehouse, Packaging Area & Production Areas.
- Solution:** 15 x 535mm Rigid98 Commercial Tube Kits & 26 x 535mm Rigid98 Tube Kits.

Result:

All areas where Sky Tunnel have been installed have seen a considerable drop in energy usage. In the production areas Green Cross were concerned about adding heat to the building as it might affect the chemicals that are used. Green Cross are very pleased the Sky Tunnels have not introduced any heat to the building, in fact the temperature has been reduced. During good daylight hours, Green Cross are no longer having to use the electric lighting system, which was generating a lot of heat.
